

ARTROMIC

Chondroprotector
Oral powder

Indications:

Artromic is recommended to support, prevent and as chondroprotector (articular regenerator) in osteoarticular pathologies such as: arthritis, arthrosis, osteoarthritis, osteoarthrosis, osteodystrophies, osteochondroses, bone cartilage fractures. It is also recommended as post-surgical treatment in these pathologies. It contributes to the recovery of non-infectious synovitis, tendinitis and tenosynovitis, etc. It is ideal for fast-growing or large animals lacking or with excessive exercise and/or genetic predisposition to these pathologies.
