

ACARMIC CANINE

AGAINST TICKS, LICE AND MANGE

Formula:

Each 100 mL contains:

Amitraz	12,5 g
Excipients q.s.ad	100 mL

**Indications:**

Broad spectrum ectoparasiticide. Against ticks, lice and mange.
Specially formulated to combat ticks resistant to other active ingredients (organophosphorus and pyrethroids).

-

Target Species:

Canine

Route of administration:

External use (immersion, spray baths)

Dosage:

Foot of bath: 20 mL of Acarmic every 10 liters of water.

For demodectic or sarcoptic mange: 20 mL every 5 liters. Weekly baths until its disappearance are advisable.

Immerse the whole body at least for 20 seconds to guarantee the total impregnation of the product, otherwise use a sponge to apply it (make sure the animal is completely wet), including the head; avoid eyes, nose and ingestion.

Shake constantly the product during the application.
